### THAT SETTLES IT.

Brought into Competition With the

World's Best Carries

off the Honors.

At the great Centennial Exhibition of 1876 the leading products of all the branches of the world's industries were assembled at Philadelphia. To carry off a prize in the face of that tremendous competition was a task of no ordinary difficulty. Inventions and preparations for the alleviation of pain and the cure of disease were present in the greatest variety, representing the skill and the profoundest study of the age, and it may be of vital importance to you personally to know that the highest and only medal given to rubber porous plasters was awarded to the manufacturers of BENSON'S CAPSICINE POROUS PLASTER, by the following jury:

DR. WM. ROTH, Surgeon-General Prussian Army.  
J. H. THOMPSON, A. M., M. D., Washington, D. C.  
C. B. WHITE, M. D., New Orleans.  
ERNEST FLEISCH, M. D., Austria.

The decision was afterward confirmed by the medical jury at the last Paris Exposition. Knowing the value of such high and unbiased testimony, the medical profession, both in the United States and Europe, quickly threw aside the old, slow-acting plasters they had been using and adopted Benson's in their regular practice. That physicians and surgeons of the broadest reputation did this distinctly proves the intrinsic merit of the article.

It is not more than just to add that the average physician of to-day is not dominated by the prejudices which retarded the progress and modified the successes of his predecessors of not more than twenty-five years ago. He accepts hints from all quarters and endorses and adopts demonstrated healing agents wherever he finds them.

The right of Benson's Capsicine Porous Plaster to stand at the head of all external applications, whether for the mitigation or cure of disease, is no longer questioned. Let the purchaser, however, be on his guard against imitation. The genuine has the word CAPSICINE cut in the middle. Newbury & Johnson, Chemists, New York.

### PLAIN TRUTHS

The blood is the foundation of life, it circulates through every part of the body, and unless it is pure and rich, good health is impossible. If disease has entered the system the only sure and quick way to drive it out is to purify and enrich the blood.

These simple facts are well known, and the highest medical authorities agree that nothing but iron will restore the blood to its natural condition; and also that the iron preparations hitherto made blacken the teeth, cause headache, and are otherwise injurious.

Brown's Iron Bitters will thoroughly and quickly assimilate with the blood, purifying and strengthening it, and thus drive disease from any part of the system, and it will not blacken the teeth, cause headache or constipation, and is positively not injurious.

Saved his Child.

17 N. Euter St., Baltimore, Md. Feb. 12, 1880.

Gents:—Upon the recommendation of a friend I tried Brown's Iron Bitters as a tonic and restorative for my daughter, whom I was thoroughly convinced was wasting away with Consumption. Having lost three daughters by the terrible disease, under the care of eminent physicians, I was loath to believe that anything could arrest the progress of the disease, but, to my great surprise, before my daughter had taken one bottle of Brown's Iron Bitters, she began to mend and now is quite restored to former health. A fifth daughter began to show signs of Consumption, and when the physician was consulted he quickly said "Tonics were required," and when informed that the elder sister was taking Brown's Iron Bitters, responded "that is a good tonic, take it."

### AS IRELAND IS SO WE WOULD BE.

As between Ireland and America we are for America, first, last and all the time, but as between Ireland and England we must confess that our sympathies are with Ireland. It seems to us that no one can look over the history of the last 800 years, through unprejudiced spectacles, without being convinced that Ireland has been very badly treated. At that time the spirit of English aggressiveness was beginning to manifest itself, and she was looking around for some one she could whip. Ireland was a peaceable island, filled with an educated and hospitable people, living within themselves and but little skilled in the arts of war. Permission was gained from the Pope to conquer it and convert the inhabitants to the true religion, and the fight began, and it will, apparently, never end. The land was taken from the Irish people and parcelled out among the English gentry, who have exacted as rents every atom that could be squeezed out of it. If George Washington had been whipped, we of America would be in exactly the same condition. Instead of using the profits of our labor to build cities and homes, and make provisions for old age, we would be a nation of hungry beggars with only potatoes to eat and rags to cover us. We do not defend dynamite, but we believe England's aggressiveness must be curbed. Civilization has reached a point where it does not need the aid of a bully to whip all who are not able to make guns and keep ships of war. There is no demand for the forcible conquest of Africa, India or South America in order to spread the Christian religion or British commerce. We can do that by the railroad and telegraph. The day for England's methods is past and the powers of the earth will let her know it soon if she does not realize it herself.

### A KNOWING COOK.

Rev. Joseph Cook looks down from his sublime height to utter these words to the pigmies below: "I know that editors look upon their papers as bank bills. I ask that editors should make their profession something more than a financial venture." We timidly raise our eyes from the ground to return the compliment, says the Bee, and delicately venture the suggestion that Rev. Joseph Cook and his ilk should take a little of their advice to themselves. Did he, or Beecher, or Talmage ever deliver a sermon that was not a financial venture? Have they not refused time and time again to lecture for charity's sake unless they were paid \$150 per night? Did not Beecher, while gathering in golden shekels on this coast, decline to open his lips in aid of the yellow fever sufferers, and allow himself to be put to shame by the open-hearted generosity of Bob Ingersoll? Has not that howling jumping-jack, the middle-aged "boy-preacher" Harrison, frequently disgusted the churches by his greedy rapacity. Admonition to newspapers from such a source comes with as good grace as a sermon from an overfed Alderman on the sin of gluttony.

The population of Ireland in 1881 was 5,174,836. According to the census of 1880 there were 1,554,000 natives of Ireland in the United States. Immigration since the census was taken has brought the number fully up to 2,000,000. From 1820 to the present time the total immigration from Ireland to the United States is about 3,300,000. It is therefore evident that we have a population of pure Irish blood quite equal to the population of Ireland. Is it strange that we have Irish conventions in the United States, and Irish organizations and sympathizers with the cause of Ireland?

It is estimated from experiments that \$100 is lost by friction in counting \$14,000,000. Another consolation for poverty.

## EASTERN DISPATCHES.

(PRESS DISPATCHES TO THE GAZETTE.)

A Senator Who Protests Against Revitalizing a Forfeited Railroad Land Grant.

WASHINGTON, May 9.

The following letter was to-day written and delivered by Senator Van Wyck in person to the Secretary of the Interior: "When the order was made recognizing the New Orleans-Pacific Railroad Company's title to land grants many years forfeited, I felt it my duty to ask your department to be informed of the progress of the proceedings, with a view to oppose any further legislation and to prevent further absorption of the public domain by a corporation which had not even the semblance of legal or equitable rights, and also to protect settlers who have been occupying and improving portions of this dead grant. The New Orleans, Baton Rouge & Vicksburg Railroad Company in 1871 obtained a large grant, stipulating that said company should complete the whole of said road within five years from the passage of the act. The five years have expired and not a mile has been built, not even a survey made, not a definite location. Their only act was to issue and distribute bonds among the parties who were intent on developing the country. Five years more pass, and the grant is doubly dead; not yet a mile constructed or definitely located. Its third act was, in December, 1882, to assign what it did not own to another railroad company which was organized by the Legislature of Louisiana in 1876 to build a road through substantially the same section without expectation of any aid, known as the New Orleans-Pacific Co., which finally drifted into the hands of a syndicate who had also been patriotically developing the country, so that millions of dollars and millions of acres had rewarded their sacrifices and exertions. It became necessary for the system of roads they controlled to connect with New Orleans. They built roads without assurance of aid from the Land Department or Congress, not even filing a map of the definite location of any portion of the road. They knew only that Congress could vitalize a dormant grant. It is great presumption even for a railroad corporation to assume that this could be accomplished simply by their fiat, and now they hope to forestall action by the recognition they have obtained from your department. They must have well known that title to these lands is not complete till final action by Congress. I realize your embarrassment when Congress at its last session failed to act. The Attorney-General had given to your Department, in response to a request from your predecessor, an opinion that the company had a right to said grant. An additional necessity for this notice is that the present New Orleans-Pacific company are about issuing mortgage bonds on this forfeited land grant, and they naturally desire it legalized long enough to put these bonds on the market. Two trustees are named, one in the interest of the bonds issued 12 years ago; so the victims are to be the settlers on that portion of the public domain or purchasers of the lands. My object is that Congress shall not be met at the next session with the plea that innocent purchasers bought these bonds, and that they should be protected. A patient Government has been delayed 13 years, and now a few months further delay will work no injury. As the corporation is endeavoring in this manner to utilize a dormant grant, you will allow me to make this public, as my purpose is to aid the public and prevent imposition by the sale of bonds secured by a forfeited title which may be declared worthless.

Parents Leave Children at Home and One is Burned to Death.

PALMYRA, Mich., 8.

Lyman Haveland and wife last night left four children alone in the house. Alice, the oldest, 13 years of age, fell asleep reading a paper, which caught fire, setting the house and her clothes ablaze. She ran out of doors and burned to death. A boy nine years old rescued the baby and the fourth child escaped. The father returned, seriously burning himself by rushing into the blazing house before he knew the children were all safe.

Secretary Lincoln has Faith in Crook's Discretion.

WASHINGTON, May 9.

The attention of Secretary Lincoln having been called to the report that Crook would be in danger of court-martial for crossing the Mexican border, Lincoln said: "It is perfectly absurd. I have not the slightest idea that Crook did anything not in accordance with the agreement between Mexico and this Government."

The Civil Service Commissioners About to Assume Their Duties.

WASHINGTON, May 9.

The new civil service rules having been approved, the Commissioners will leave Washington in a few days for the purpose of putting examining Boards in operation in all the large cities. As the provisions of the civil service bill relating to appointments

take effect July 16th, it is essential that examinations be held before that date. The Commissioners expect to have their bureau in this city in working order about the first week in June, and they propose that Examining Boards in cities will be fully established in time to secure an examination of applicants for positions in the service some time before July 16th. The work has been divided so that each Commissioner is assigned to a district. Commissioner Eaton takes the principal eastern cities, such as New York, Philadelphia, and Boston. Commissioner Gregory is assigned to Chicago, Milwaukee, Buffalo, Detroit, Toledo and other large cities; and Commissioner Thoman to Cincinnati, St. Louis, Pittsburg, Kansas City, New Orleans, and other cities in the Southwest. Each Commissioner will take with him an assistant detailed from one of the Departments in Washington. These assistants will be selected from among officials who have already served on the Examining Boards in the Departments here and who are familiar with the work. The Examining Boards in cities will be selected by the Commissioners from persons in service in those cities, and these will hold examinations not more than twice a year.

An Army Paymaster Puts up a Job That Didn't Work.

SAN ANTONIO, Texas, May 9.

Quite a sensation was created in this city to-day by the confession of Major Wasson, the paymaster alleged to have been robbed of \$24,000 on the train near Fort Leavenworth, that the whole transaction was a fraud to cover his short account with the government. Wasson is now here at headquarters under arrest. Having failed to obtain a clue to the robbers, Wasson was ordered here to turn over the balance of funds in his hands to Chief Paymaster Terrell and settle his account. Examination by Colonel Terrell exhibited a shortage of \$5,500. Wasson confessed this deficit, but claimed to have made up the amount and being robbed of \$4,000. He was further questioned and finally made a clean breast of the whole affair—that he had put up a job to cover his shortage. He was immediately placed under arrest at headquarters, scantily provided with necessities and heavily guarded by soldiers. It is said his bondsmen are good for the indebtedness to the government of \$5,500. He designated the hiding place of the remaining \$18,500, and officers were sent for it. A list of officers for a court-martial has been made out for the trial, which will occur quite soon.

Society at the Capital not Surprised at Senator Fair's Divorce Suit.

WASHINGTON, May 9.

News of the divorce suit between Senator Fair and his wife caused little surprise in Washington. Fair has brought his wife here but once, and it has been rumored that they did not live happily. A Congressman who claims to know the family history says he was not surprised at the suit. He had known for a long time that Mr. and Mrs. Fair did not live happily together, and he thought the Senator would not oppose the suit. He says Mrs. Fair is of a jealous disposition and has often accused her husband of infidelity. The Senator, he added, is willing to accept a separation on most any terms. When asked whether it might not influence Mr. Fair to resign his seat, the gentleman replied that he wouldn't be surprised, as Fair was not over pleased, he thought, with his Senatorial life. He prefers the more free and easy western life.

Saloon-keepers Who Decline to Obey a Mayor's Orders.

MILWAUKEE, May 9.

Mayor Stowell, who issued orders to close saloons at midnight and that the police shall not drink liquor while on duty, to-day received a threatening letter, in which it was declared that the saloon-keepers had decided to kill him if he enforced his orders. The letter was signed "H. M.," the initials of Miller, a prominent saloon-keeper, who was to-day refused a license because he would not promise to close at midnight and even declared openly his intention to violate the order. His friends say the letter was a trick of his enemies to get him into disrepute with the Mayor. Saloon-keepers almost all refuse to obey the order, and trouble is anticipated.

Rumors of Disaster to Gen. Crook not Credited.

CHICAGO, May 9.

Officers at General Sheridan's headquarters in this city do not credit the rumors of disaster to Crook's column. While it is true that they have no recent advices from Crook in person they are in the way of receiving quick communication from any point in Texas or New Mexico in case of an engagement, and particularly so in case of disaster. Any report which Gen. Crook might make of operations in or from Arizona would go to the headquarters of the Department of the Pacific at San Francisco.

Land Can be Taken up for Speculative Purposes Under Certain Circumstances.

WASHINGTON, May 8.

The case of Plummer vs. Jackman, involving title to 160 acres of valuable

land near Bismarck, Dakota, has been decided by the Secretary of the Interior in favor of Jackman for the whole quarter-section. Jackman's claim to the land was contested upon the ground that he had not settled upon it in good faith, but to sell in speculation, in violation of section 2,262 of the Revised Statutes. He took the land at that particular point, 1872, with other parties, in anticipation that the Northern Pacific road would cross the Missouri river there and a town be built. The Secretary in his decision says: The statute referred to cannot be construed to mean that persons going to the frontier or along the lines of projected railroads and anticipating centers of population shall not enjoy the benefits of their enterprise and foresight, though they believed their claims would become of great value on account of proximity to villages or cities, or that villages or cities would even be built upon such claims, and thereby enable them ultimately to realize large prices for such land. That is not the speculation the statute intended to prohibit.

Gounod's sacred trilogy, "The Redemption," was sung by the Choral Society of the First Congregational Church last evening—the first time in San Francisco and the fifth time in the United States. The attendance was large and the performance a success. It will probably be repeated.

A Solid Proposition.

Since the starting of the Navajo-Independence mill at Tuscarora last July, the Navajo Company have shipped 317 bars of bullion and the Independence 82; total, 349 bars, yielding in round numbers about \$700,000. For 10 stamps this is a remarkably good showing.

PREJUDICE AGAINST PORK.

No Reason for the Gentle Pig Being Tabooed.

Better breeding and greater care is fast removing the overdone prejudice against the pig. While there is danger still from eating rare meat, especially from an animal raised and fattened in filth, the meat of the healthy pig is not only toothsome but very nutritious. The children of Israel called him unclean because he divides the hoof and chews not the cud, but what has the curse of Moses pronounced 6,000 years ago to do with the pig now; in spite of it the pig has held his own against the Jew and Mohammedan. Whilst they have diminished he has increased; they have lost their promised land; he has entered his. The land of corn and wheat is to him the land of Canaan. He would have cut a pretty figure following Moses in his marching 40 years through the wilderness. It was policy for Moses to banish the pig from his camp. Their mode of life and short rations would have made the pig a troublesome beast in their camp. He loves good living and plenty of it.

It has been said that the pig is a dirty, lazy, filthy beast, imbued with the spirit of contrariness and self-will and generally unmanageable in conduct. Such epithets would have done 40 years ago, in times of land pikes, the ill-favored, pelican-smouted elm-peelers, and razor-backed hazel-splitters, which would readily drink butter-milk from a jug and had knots tied in their tails to keep them from crawling through the fence. The pig of the present is very much of a gentleman. The modern Berkshire, little black Essex, Cheshires, Jersey Reds, and the sleek Poland-China, if well-fed and well-bred are the perfection of meat-making machines and almost sure to be a source of profit as well as pleasure to a well-balanced farmer. Always remember that the pig wants morning, noon and night, good food in large quantities, kind treatment and a place to sleep, and you will have no cause of complaint. He is found to produce a pound of product from less food than either cattle or sheep, and is, therefore, the most economical machine to manufacture our crops into marketable meat.

THE CHICKEN BUSINESS.

An Enterprise That Promises to Make Good Returns.

Frank Perkins is going into the chicken business with much vim and enterprise. He proposes to raise fowls on a large scale, and has sent for several incubators, which, when fairly at work, will turn out chicks at the rate of about 3,000 a month. He will also employ turkeys for hatching chickens, having learned by experience that a faithful turkey will incubate more eggs than a dozen hens. The plan is to pull the feathers from the turkey's breast so that he will be inclined to hug up to anything that will protect the bare spots from the cold. When he is placed upon a lot of warm porcelain eggs—door-knobs will do as well—and strapped down until he gets so used to the position that his legs are useless, after which a couple of dozen hen's eggs are put under him, which he hatches out in due time, and proceeds to tackle another batch, and this business he will follow as long as he lives. At night the young birds are put into a room on the floor of which is a few inches of wool, in which the little birds are kept snug and warm. There are lots of money in the business if properly conducted. Perkins has 10 acres of grain in for chicken feed, and will be prepared to feed all the fowls that can stand upon the ranch.

A Man of Enterprises.

Haverly, the theatrical manager, is evidently trying to build up a reputation for enterprise. The eastern papers have an "ad." a foot square reading as follows:

J. H. Haverly's enterprises: Haverly's Theater, New York; Haverly's Theater, Brooklyn, N. Y.; Haverly's Theater, Philadelphia, Pa.; Haverly's Theater, Chicago, Ill.; Haverly's Theater, San Francisco, Cal.; Haverly's Theater, Salt Lake City, Utah; Haverly's Theater, Portland, Oregon; Haverly's Theater, Victoria, British Columbia; Haverly's Silver King Company, No. 1, traveling; Haverly's Silver King Company, No. 2, traveling; Haverly's Opera Company, traveling; Haverly's Dramatic Company, traveling; Haverly's Consolidated Mastodon Minstrels, traveling; Haverly's New Minstrels, traveling; Haverly's Mining Exchange, New York; Haverly's Mining Exchange, Boston; Haverly's Invincible Milling and Mining Company, Rosita, Col.; Haverly's Golden Group Mining Company, San Miguel, Col.

A FEARFUL ACCIDENT.

Two Miners Mangled by the Carelessness of an Engineer.

On Monday morning last a fearful accident occurred at Mills' mine at Argentine, in which two men were badly injured, one of them fatally, in all probability. The night-shift were coming off, and the two men Thomas, Thomas and Frank Johnson, got in the bucket to ascend the shaft. When up about 40 feet the bucket caught in the bell-wire, and the bell rang once—the signal to lower. The brake-tender stopped them, but by some means did not put on the brake, and the men were instantly precipitated to the bottom of the shaft. Johnson escaped with the fracture of one of the bones of the leg, below the knee, and a few bruises, but Thomas was fearfully injured. His right ankle was broken, smashed to a jelly for several inches, and one arm broken at the elbow, the bones protruding through the skin. The bucket-hook caught in the flesh of the thigh, and tore a fearful gash nearly to the bone. Five of his ribs were broken, the end of one piercing the lung. Besides these injuries, he had a severe cut on the head, and several bruises on all parts of his body. If he lives the probabilities are that his leg will have to be amputated. Considerable difficulty was experienced in getting Thomas out of the shaft, as he was in such a condition that it was impossible to bring him up in the bucket, and a cage, or box had to be made for the purpose. It was some two or three hours before he was brought up. Drs. Cate and Barrett were sent for, and everything possible done for the comfort of the injured men, and they were removed from the mine to C. E. Loring's ranch, where they are at present. Mrs. Miles Schofield of Gibsons, a sister of Mr. Thomas, came over Tuesday, accompanied by her husband. Their parents live near Strawberry valley, and the news will be a sad shock to them, as they are very old.

PLUMAS ITEMS.

News Collected from the Columns of Our Quincey Exchange.

The National of May 5 contained the following:

On Tuesday last a boy named Nye, aged about nine or ten years, was drowned in the mill-race at Taylorville. The accident occurred in the evening. The boy was fishing in the race above the mill, and by some means fell in and went to the bottom. The water was drawn down, and the body was found at the gate near the mill.

Chinamen are killing the fish in Indian creek, above Shoo Fly, with giant powder. This should be stopped at once, and if possible catch the guilty ones and make them pay dearly for their devilment. They not only kill the fish out of season, but they kill all the smaller ones within reach of their blasts.

The work of boring Mills' big shaft is going steadily on, and about 156 feet of tubing is now in. The borer goes down from two to three feet per day, and for the past three weeks has been cutting through a beautiful bed of blue gravel, which contains some gold. There are many indications that the bed-rock will show good pay, and the best miners who visit the shaft are highly pleased with the character of the gravel.

NEVADA'S BAD SENATOR.

Cause of the Trouble Between Him and His Precocious Son.

About 10 days ago it was reported that the son of Senator Fair of Nevada had drawn his pistol on his father in San Francisco, in a quarrel about family matters. It is well known that Senator Fair and his wife have been at outs for some time, and the knowledge of this fact gave color of probability to the report. A member of the Stockton Herald's staff who was in San Francisco last week learned the particulars of the row between father and son. The boy is wild and extravagant, and the old gentleman is wild and stingy. The young man walked into his father's office in the Nevada block and asked him for some money. The Senator looked up and saw that his hopeful, who is a handsome lad of 20, was considerably under the influence of liquor. This and the recollection of previous visits of the same kind caused the Senator to say in his refined way to his son: "You d—d—d—! How dare you come here and ask me for money?" Young James replied fiercely: "That's the last time you'll call me that name. I want you to remember that my mother's a lady, — you! If you ever call me that name again I'll put a hole through you. By —, I've a mind to do it now!" and the young man reached under his coat tails and jerked out a pistol.

A faithful secretary interfered energetically and patricide was prevented.

It is reported that the Senator, when loosed from his present matrimonial entanglements, will marry Miss Carpenter, niece of Tom Fitch, whose peculiar relations with Dr. Smith of Arizona, it will be remembered, were pretty thoroughly aired in a San Francisco court a few years ago.

IMMIGRATION.

The Tide Pouring In from All Parts of the World.

Seven car-loads of immigrants went west last night, made up of almost every European nationality. They are coming west at a great rate. The number of immigrants who arrived during the week ending last Saturday, by the overland routes, was 1570, as reported by the California Immigration Association. D. W. Honn, the agent of the association at Council Bluffs, writes under date of April 26th that during the past three weeks he has classified 1036 persons in separate cars whose final destination was California. Advice was also received by the association that the Harrison steamship line of Liverpool has decided to put on steamers to run regularly between that port and New Orleans, and that the first steamer would leave on the 3d instant. Immigration tickets can now be purchased from Liverpool to San Francisco via New Orleans by this route for \$72 50, and it is reported that this will cause a large immigration from Great Britain to California. It is thought that the French and German immigrants will generally use the French steamship line from Havre to San Francisco via New Orleans. The rate of fare is \$65.

Delicacies for the Comstock.

Though the Virginia people may be broke—flat-busted and without a splinter—they live well. They are the kind of folks who walk through a graveyard to the measure of a lively whistle and fancy they are taking a pasquer in a flowery park. This is suggested by seeing the Spring lamb (two bits a pound) strawberries and other toothsome truck that goes through Reno every day to grade the stomachs of Comstock gourmands.

To be Built.

The Commissioners decided to-day to appropriate \$3,000 for the Verdi bridge. The citizens of Verdi will raise the balance.

ICHI BAN doubled in size is the largest Japanese sale exhibition in the world. Shattuck & Fletcher export their printing inks to Japan, receive Japanese goods in return, pay for their advertisements with printing ink, and this is why Ichi Ban exists on low prices. Logical, isn't it? Wholesale and retail. Goods for every branch of country and retail trade. may21
